# LUSHNA Sauna: FAQ

## **What is included in the BASIC price per unit?**

Basic price includes the structure, roof, facades, and sauna equipment. Foundations, transport and installation are not included in the basic price. Upon request we can provide a complete solution including our "Ground Screw foundation system", ecological and concrete free.

## **Is it wired/able to have heat, AC, fan, electricity, water?**

All electrical installation and sauna heater and control unit are installed. Sauna is ready to be used. Sauna kit is included with thermostat, bucket for water and wooden pillows.

## **What preparation for the placement of Vilas needs to be made?**

You don't need to pre-prepare your land. We can adapt to the topography. Nevertheless we need you to provide connections for electricity, water and sewage for those units, which require this. We can offer the complete support on designing and planning your destination.

## **Time of delivery? LEADTIME?**

We can deliver up to 5 units in 3 months from the order.

## **Foundations**

We use ecological Ground Screws Foundation from Krinner, Germany. We just screw the foundations to ground and place the cabins on the screws and bind them together. In this way no pre-preparation of the location is necessary. We don't damage the location and cabins can be moved to the other location without major visible signs on the previous location.

## **Warranty**

5 years on the roof and construction and 2 years on the textile parts
